How was life at home during the corona school lockdown

Life at home was not easy at all. Despite wearing masks, my mother was not comfortable going to the find money and lots of time we hard difficulties in having our meals. But when the school distributed food it was so breathtaking to my family. Thank you so much for all the support

Are you happy to come back to school after the school lockdown

When the government announced that schools will reopen on June 29 I was so happy. I wanted to see my teachers and friends again, during the holiday I was doing a lot of revision. Now that I am at school we are taught and we hope we will finish our syllabus.

What are your dreams for the future:

I would like to become a soldier.

Is there anything you would like to say to your sponsor:

How are you and your family? I pray for you that God protects from the virus and you stay safe and health.

Thank you so much for your support because now I am sure of getting my meal breakfast something which was impossible during the lockdown.
God bless you abundantly.
